	<p>Scarify/vacuum turf runway at Wayne Municipal Airport. This operation should take about 2 days to complete (weather permitting). Large objects should be removed prior to our start.</p> <p>This process will generate quite a pile of debris that will need to be hauled away. We will need to establish 2-3 dumping locations for these debris piles that you can remove at a later date. This debris will contain mostly organic thatch matter, but will also contain whatever solid debris is picked up out of the surface root zone. So plan disposal accordingly.</p> <p>Although, we can not guarantee 100% removal of all undesired splinters and objects, we have been quite successful in past similar situations.</p> <p>If upon inspection, a second pass over in a diagonal direction is desired, then just double the time, and the price.</p> <p>This procedure needs to be performed when the ground is not frozen so that objects may be pulled out of the ground. If this is Fescue grass, it would be desirable to reseed at this time.</p>
